Phonology

Vowels

- /iː/ is realized in a very original manner. It is a syllabic, palatalized frictionless dental approximant [ǫ̟ʲː]. This realization is also found in some dialects of Swedish.^[1]^[2]
- Old Norse diphthongs ⟨ei⟩ and ⟨øy⟩ are realized as long monophthongs [eː] and [øː]. This is the case in a large part of Sør-Trøndelag in general.^[2]
